EDUCATION

Concordia University

Bachelor of Software Engineering

Montreal, QC

Tentative Graduation: June 2028

EXPERIENCE

Production Engineering Fellow

Remote

Meta x MLH Fellowship

June 2026 – September 2026

- Selected for a competitive **12-week Production Engineering fellowship** with mentorship from Meta engineers and hands-on infrastructure training.
- Developing and deploying a web app using **Flask**, **MySQL**, **Docker**, **NGINX**, and **Bash** automation scripts.
- Gaining hands-on experience with server administration, database management, containerization, monitoring, alerting, and visualization using **Grafana** and **Prometheus**.

Aviation Cybersecurity Intern

Montreal, QC

Bombardier Aerospace

April 2026 – August 2026

- Selected for a cybersecurity mentorship/internship supporting Bombardier's cyber resilience initiatives across enterprise security domains.
- Gaining exposure to **SOC operations**, **vulnerability management**, **IAM**, compliance, governance, and security architecture in a large international organization.

Systems Engineer Intern

Montreal, QC

Bombardier Aerospace

January 2026 – August 2026

- Led the creation of the **BES Roadmap 2027 Power BI Dashboard**, collaborating with **15+ Engineering Champions** to support the release of **300+ technical Bombardier manuals**.
- Built a data pipeline using **SQL** to organize **10,000+ records** into KPI dashboards for engineering stakeholders.
- Supported **BES 2.0 modernization** by documenting business rules, validating migrated data in test environments, and collaborating with IBM technical teams.
- Created internal tools using **Power Apps** and **Power Automate** in the BES **SharePoint** environment.
- Improved **138 legacy HTML** files using **JavaScript**, **HTML**, and **CSS**.

PROJECTS

WINNER - MLH Best Use of Solana (McHacks 13) | Solana, Rust, Anchor

[Live Demo ↗](#)

- Built a blockchain platform enabling artists to **mint and tokenize their creative identity** on the **Solana blockchain**.
- Designed and deployed **Rust + Anchor smart contracts** supporting on-chain minting, transfers, and transparent transaction history.

Gear-Pack | Next.js 16, TypeScript, Tailwind CSS, Supabase, Custom AI Agent

[Live Demo ↗](#)

- Coordinated group hikes and optimized gear packing using an **integrated AI assistant** with user-specific memory threads.
- Secured **PostgreSQL** backend via **Supabase** and **Prisma** to manage relational data.

TECHNICAL SKILLS

Languages: Java, TypeScript, Python, JavaScript, SQL, C, Bash

Libraries/Frameworks: React, Next.js, Flask, Docker, NGINX, Pandas, NumPy, MongoDB, UNIX/Linux

Tools/Concepts: Power BI, Power Apps, Power Automate, Grafana, Prometheus, GitHub Actions, Cybersecurity Fundamentals

Relevant Courses: OOP I, OOP II, Data Structures & Algorithms, OS, Data Analytics, Web Programming

ACHIEVEMENTS, LEADERSHIP & HOBBIES

Achievements: Winner of MLH Best Use of Solana @ MCHacks 13, 3rd Place Overall @ Meta x MLH Production Engineering Hackathon

Leadership: Crew Chief & Sales @ Student Works, leading a team of 3-5 employees

Hobbies: Hiking, Fishing, Ultramarathon Running
